MEMORANDUM FOR: Deputy Director for Support

SUBJECT: Architectural and Engineering Fees for
Langley Garage Construction

1. This memorandum contains information for the Deputy Director for Support.
2. In response to your request to me on 26 May 1970 concerning architectural and engineering (A&E) fees for the construction of an Agency motor pool garage on the Langley Headquarters site, we would request \$62,000. This sum will include an approximate amount of \$50,000 for the actual A&E contract. The remainder of approximately \$12,000 will be used by the General Services Administration (GSA) for their technical and engineering review of the study, reproduction costs of various layouts and specifications, the costs incident to the "Invitation to Bid," and other minor administrative costs, such as travel, which GSA bills to us in connection with the work.
